

Number of RER for Each Plant

(*: Data up to the end of June 2019)

RER (Reportable Event Report)

The Atomic Energy Council issued the " Guideline for the Reportable Event of Nuclear Power Plant " with reference of US. 10 CFR50.73 to require the licensee to report abnormal events happened in the nuclear power plants since 1988. According to the guideline, the licensee shall follow the prescription of the competent authorities to submit the report(s) related to operation, radiation safety, environmental radiation monitoring, reportable or emergency event, or prompt notification, the generation record on radioactive waste.
